

## SECOND SCHEDULE - PART III

### PART III

(regulations 10)

#### FEES FOR PUBLIC INSTALLATIONS OTHER THAN GENERATION REFERRED TO IN SUBREGULATION 10(2)

The rates to be used for the purpose of determining the fees for 12 months payable on the issue or renewal of a licence for a public installation, other than the generation referred to in subregulation 10(2) shall be as follows:

- (a) before the commissioning of any part of the installation--  
1 sen per kilowatt based on the installation capacity as specified in the licence;
- (b) after the whole installation or any part of it has been completed, successfully commissioned and is ready to deliver electricity to any person:

Installation Capacity	Types of Activities		
	Generation	Transmission	Distribution
Where the aggregate power is 5kW and above	RM1.50/kW	RM0.30/kW	RM0.40/kW

For the purpose of determining the fees payable under paragraph (b), the capacity of the installation shall be--

- (i) where part of the installation has been completed, successfully commissioned and is ready to deliver electricity to any person-- the maximum installation capacity commissioned during the relevant 12 months; or
  - (ii) after the whole installation has been completed, successfully commissioned and is ready to deliver electricity to any person-- the installation capacity as specified in the licence;
- (c) where two or more of the circumstances provided in paragraph (a) or subparagraph (b)(i) or (ii) occur during the 12 month period from the date of issuance of the licence or during any subsequent 12 month period, the annual fees payable for the 12 month period shall be based on the circumstances in paragraph (a) or subparagraph (b)(i) or (ii), whichever is the higher;
  - (d) any difference between the annual fees which have been paid and the annual fees, which shall be paid in accordance with paragraph (c) for the 12 month period, shall be paid within one month from the date of occurrence of the circumstances which require a higher fee to be paid;

- (e) where licence is given for two or more activities, the licensee is only required to pay the highest of the fees;
- (f) in the calculation of the installation capacity, kilowatt (kW) is taken as 0.8 x kilovolt-ampere (kVA);
- (g) for any licence issued before the date of coming into operation of this Part, the fees prescribed in this Part shall be applied on the date that the next annual fees are due and payable; and
- (h) notwithstanding the foregoing provisions, the minimum fees payable under this Part shall be RM100.00;
- (i) For the purposes of this Part—

"commissioning" means the inspection, tests and trial operations carried out on an equipment or installation or any part of it to verify and ascertain that the equipment or installation has been manufactured, fabricated, constructed, installed, set or adjusted according to the relevant safety, operational and performance requirements so that it is ready to be used, worked or operated;

"installation capacity" means the maximum level of electrical power which an installation can be used, worked or operated over a period of time without causing damage to any part of the installation; however, for a transmission or distribution system, it shall be the maximum level of electrical power, which the system is expected or required to supply over a period of time, whichever is the higher.
