Disediakan Oleh : Jabatan Perbekalan Elektrik Suruhanjaya Tenaga
Prepared By : Electricity Supply Department Energy Commission

The Energy Commission was established under the Energy Commission Act 2001 to regulate the electricity supply and piped gas supply industries in Peninsular Malaysia and Sabah. While in Sarawak, the state Chief Electrical Inspectorate is the regulator of the electricity supply industry under the Electricity Ordinance of Sarawak.

The electricity supply service in Malaysia is basically vertically integrated with three main electricity utilities operating generation, transmission, distribution and supply activities in three different parts of the country, i.e. Tenaga Nasional Berhad(TNB) in Peninsula, Sabah Electricity Sdn. Bhd. (SESB) in Sabah and Sarawak Electricity Supply Corporation(SESCO) in Sarawak. Besides those power stations owned by the three main utilities and their wholly owned subsidiaries, there are 18 investor-owned independent power producers supplying power to the three main utilities. There are also several mini utilities generating electricity or purchasing power from the main utilities for their own use and supply the excess power to consumers within certain dedicated areas such as Petronas Gas Bhd. generates electricity by co-generation and supplies to customers within the Gebeng and Kerteh petrochemical industrial areas and Genting Utilities Sdn Bhd purchases electricity from TNB for the use of its group of companies and to supply to other consumers in Genting Highlands area.

A massive tsunami in the Indian Ocean hit some countries in South Asia and South East Asia on 26 December 2004 and caused serious destruction to the

coastal areas of these countries. However the power stations along the coastline of Peninsular Malaysia were not hit by the tsunami and hence the security of the grid system was not affected.

The total installed generation capacity in the country at the end of 2004 was 20,660 MW with a plant mix of 58.4% gas turbine and combined cycle, 18.4% coal, 2.5% oil/gas thermal, 10.3% hydro, 7.5% diesel and the remaining others such as biomass and co-generation.

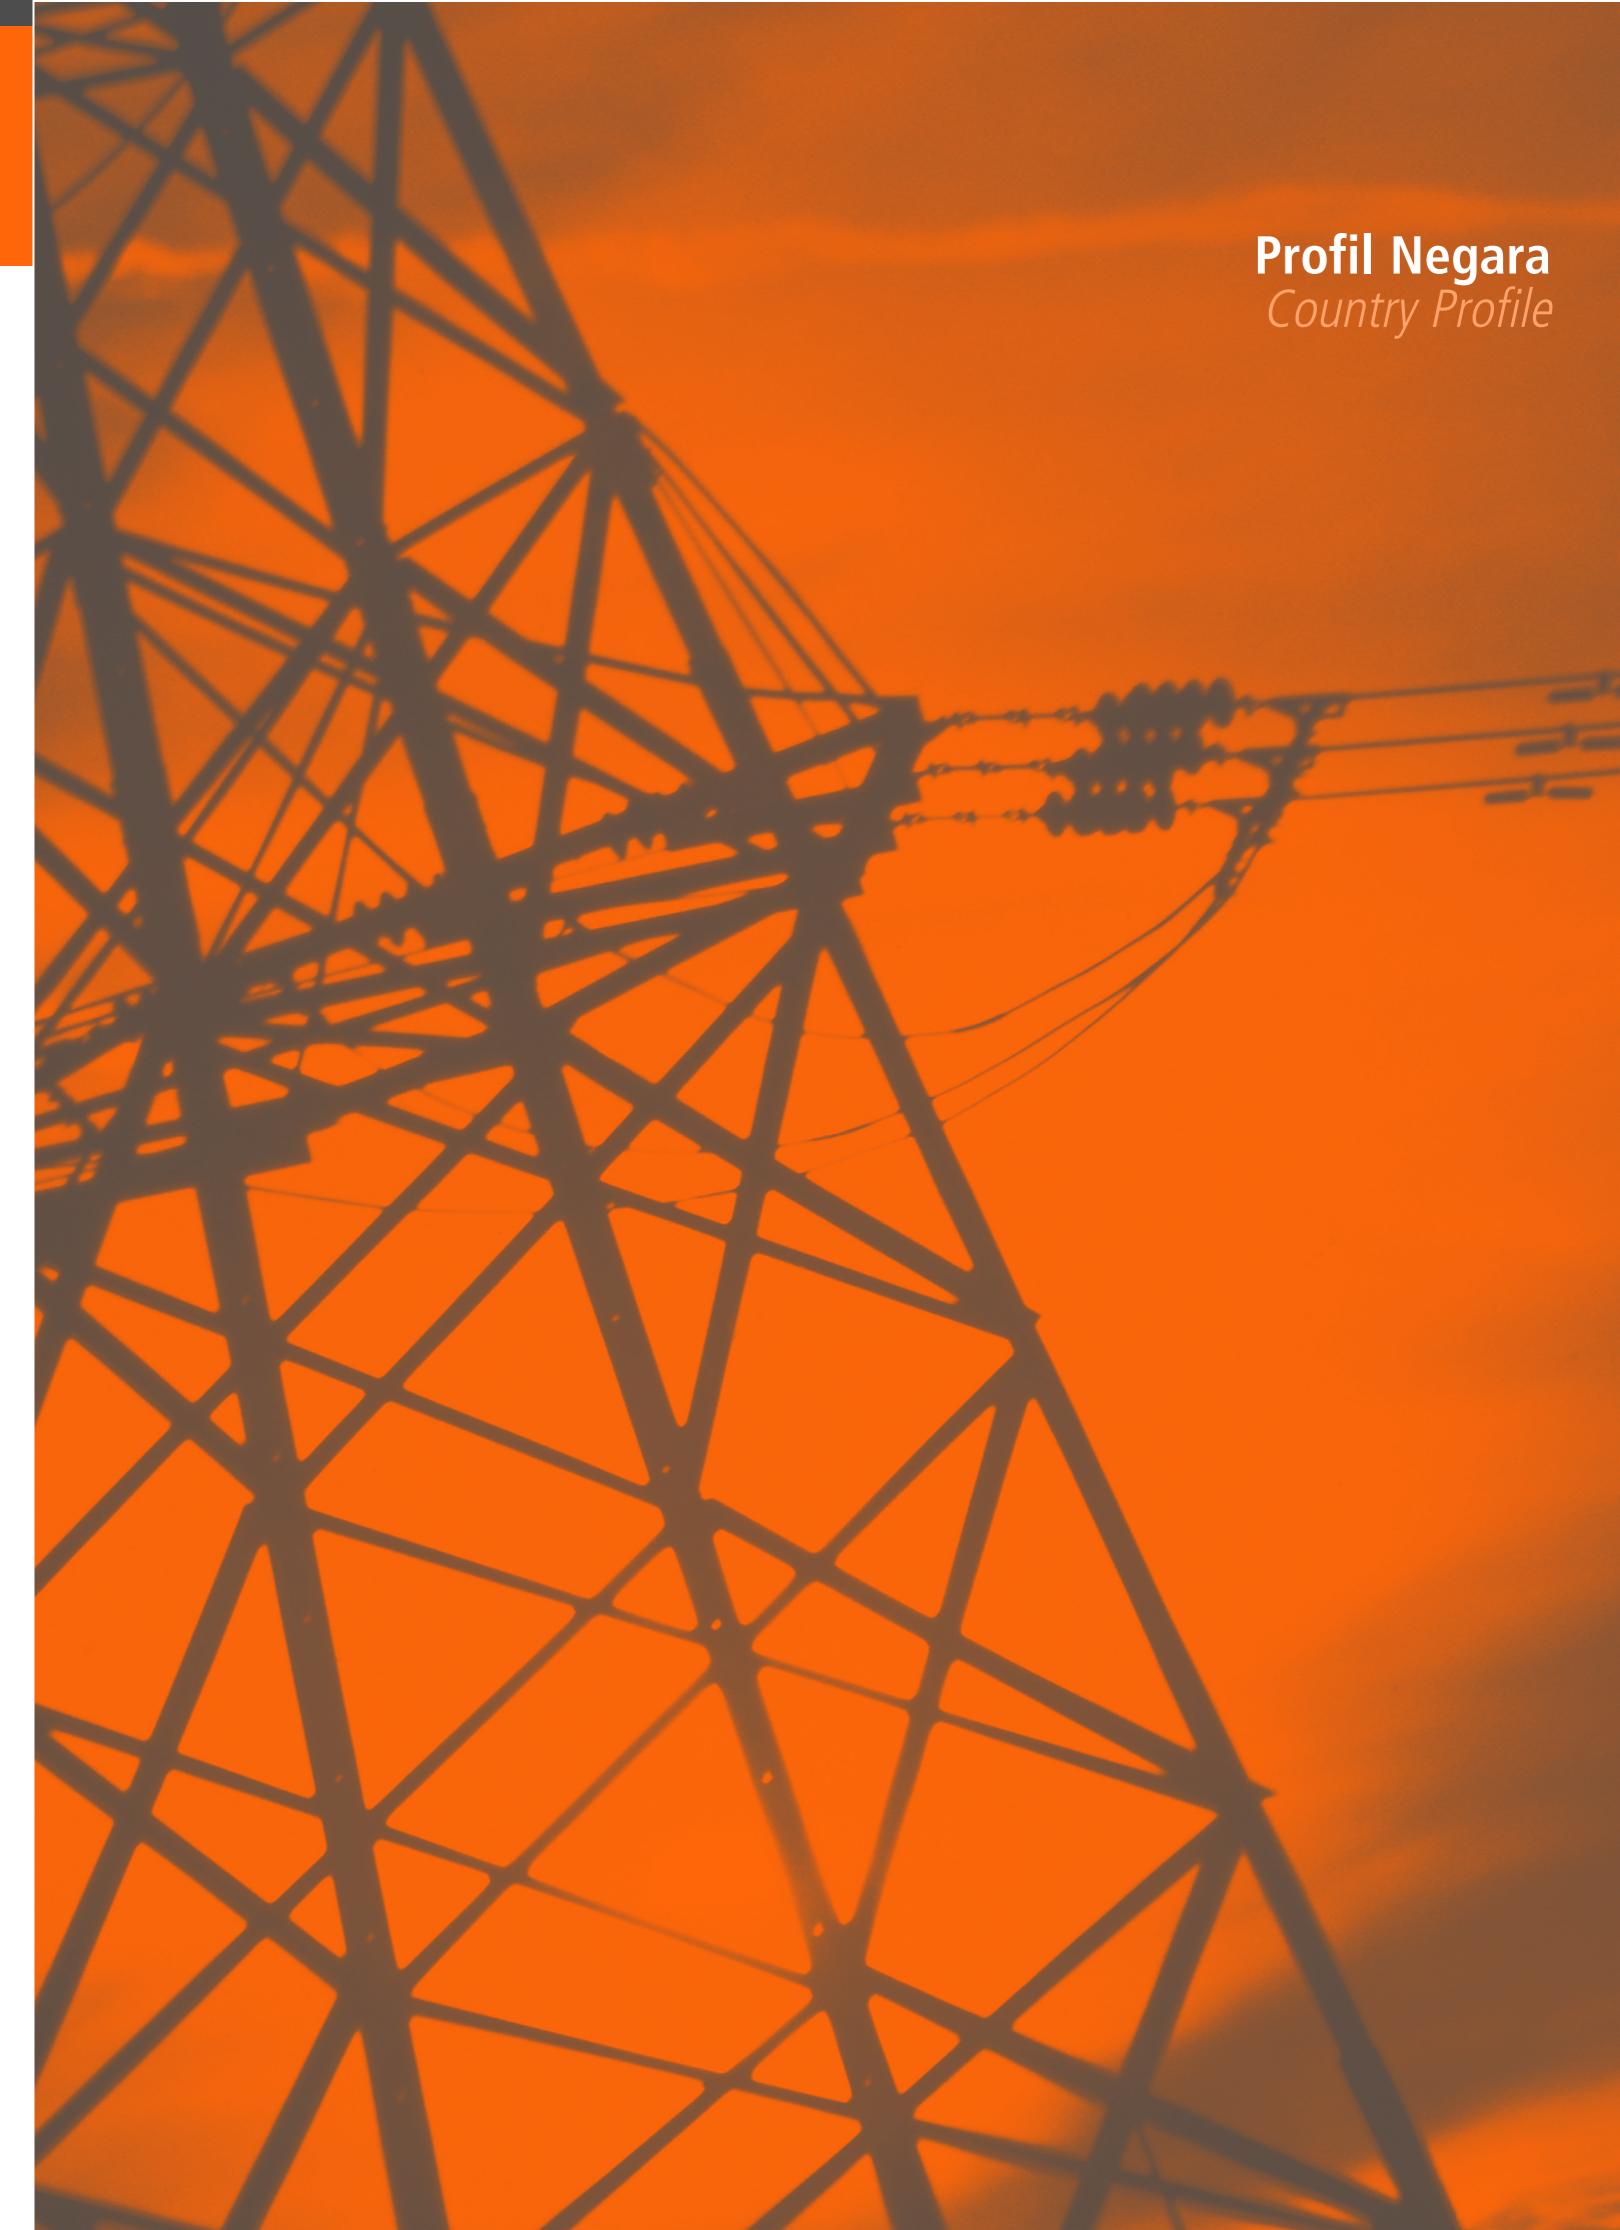

In the year 2004, the total electricity generated was 96,060 GWh with a generation mix of gas (66.5%), coal (23.5%), hydro (5.8%) and the rest diesel and biomass. The three main utilities, i.e. TNB, SESB and SESCO, generated 48% of the energy while the investor-owned independent power producers (excluding the wholly owned subsidiaries of utilities such as TNB Janamanjung which owns a 2100 MW coal fired power station in Lumut) contributed 47% with the remaining been produced by co-generation and self-generation.

The number of customers of the 3 main utilities as at the end of 2004 was 6.7 million of which 83.4% was domestic customers followed by commercial (15.5%), industrial (0.4%) and the rest (0.7%).

The maximum demand of the grid system in Peninsula was 12,023MW recorded in the month of May 2004. While in Sabah and Sarawak the maximum demands were 481MW and 685MW respectively.

In the Peninsula the SAIDI of TNB reduced from 167.6 minutes in the year 2003 to 129.0 minutes in the year 2004. In Sarawak, SESCO had shown impressive improvement in reliability of supply with the SAIDI reduced from 421 minutes in year 2003 to 327 minutes in the year 2004. While in Sabah the SAIDI of SESB increased from 1,729 minutes in the year 2003 to 2,594 minutes in the year 2004.

The Small Renewable Energy Programme (SREP) which was launched in year 2001 to encourage private sector to undertake small power generation project using renewable resources has not been progressing well due to a number of factors such as uncertainty in long term fuel supply and challenges in securing loans for financing the projects. In order to promote and increase the use of renewable energy in Malaysia, better incentives and more conducive environment need to be established.

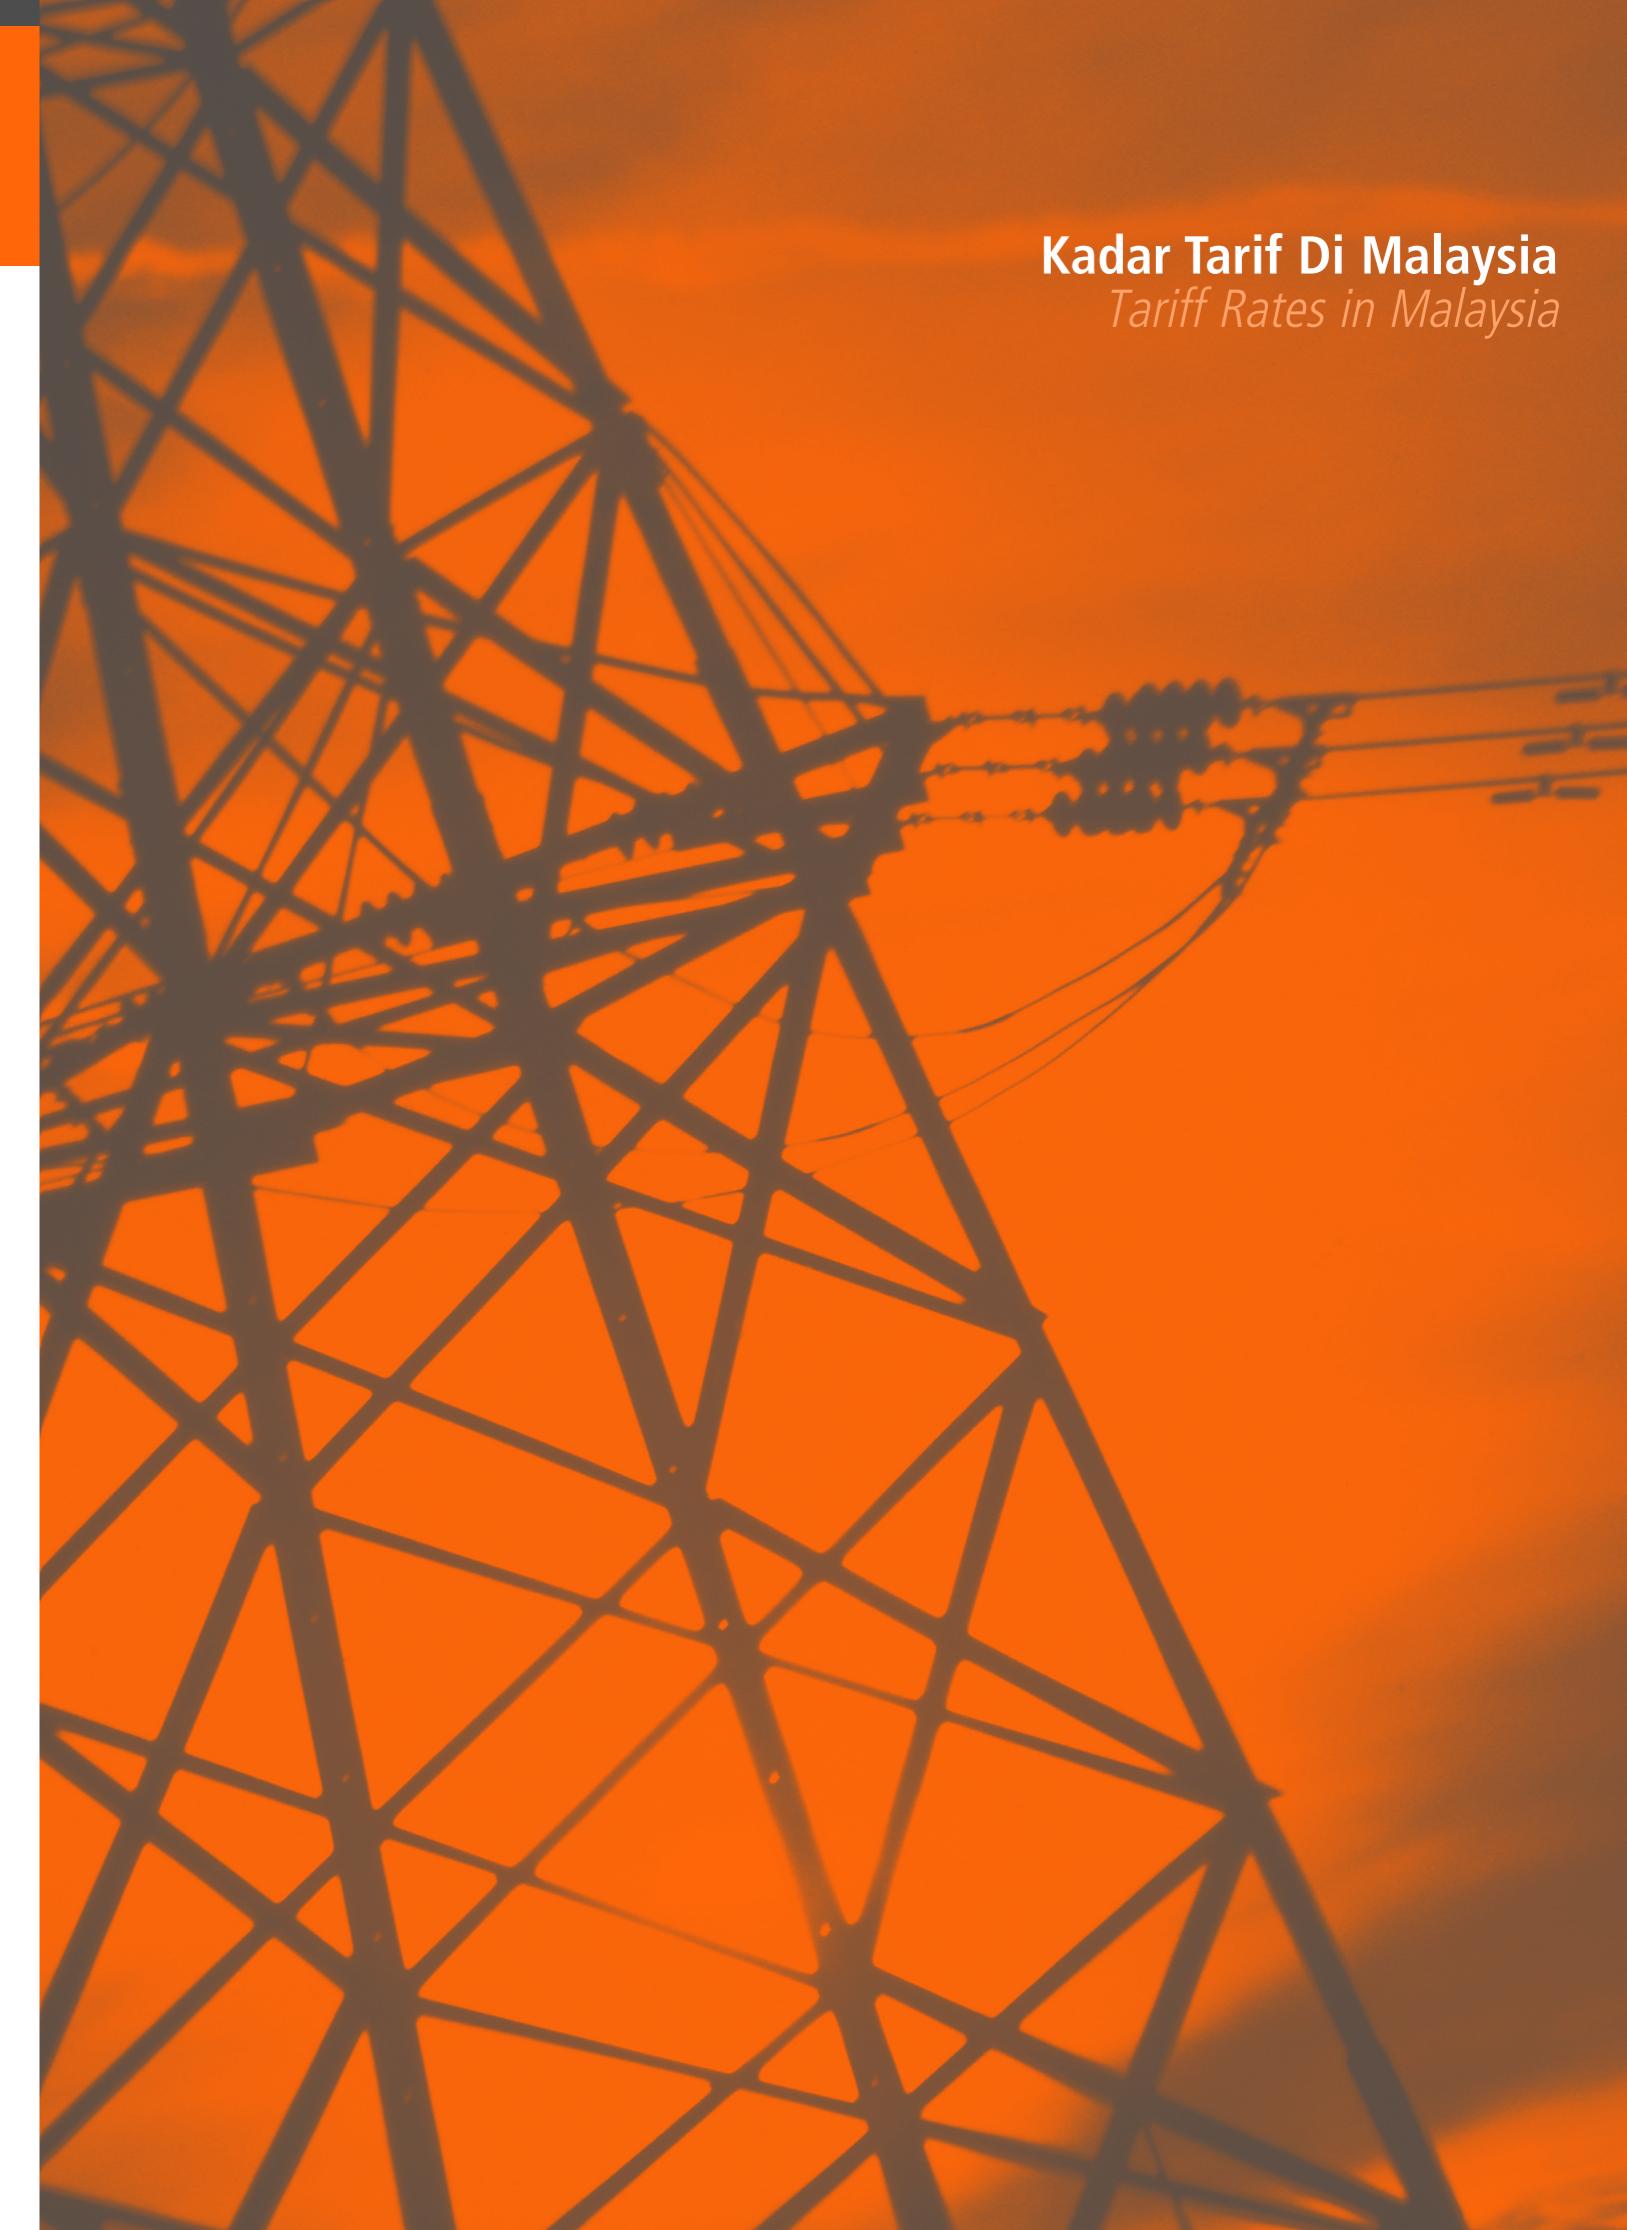

Area	329,733 sq.km
Climate	<ul style="list-style-type: none"> - Tropical Type - Average temperature between 20°C to 32°C - Average rainfall of about 3540 mm per annum
Population	25.1 ^P million with a multi racial community comprising Malays, Chinese, Indians, Kadazans, Bajaus, Muruts, Kelabits, Dayaks, Ibans and others
Labour force	10.6 million ^P
Real GDP	RM248.0 billion ^P (+7.1% ^P)
Nominal Per Capita Income	RM16,538 ^P
Real GNP	RM232.2 billion ^P (+7.2% ^P)
Nominal GNP	RM 423.1 billion ^P (+13.8% ^P)

No	Tariff Category	Unit	Rates	Promotional Discount*
8.	Tariff E3 – High Voltage Peak / Off-Peak Industrial Tariff For each kilowatt of maximum demand per month during the Peak Period For all units during the Peak Period For all units during the Off-Peak Period <i>Specially for customers who qualify</i> For each kilowatt of maximum demand per month during the Peak Period For all units during the Peak Period For all units during the Off-Peak Period Minimum monthly charges	RM/kW sen/kWh sen/kWh RM	20.80 19.80 11.80 16.20 17.80 9.80 500.00	Nil -4 Nil Nil -4 Nil
9.	Tariff F – Low Voltage Mining Tariff For all units Minimum monthly charge	sen/kWh RM	21.80 100.00	-4
10.	Tariff F1 – Medium Voltage General Mining Tariff For each kilowatt of maximum demand per month For all units Minimum monthly charge	RM/kW sen/kWh RM	12.00 17.80 100.00	Nil -4
11.	Tariff F2 – Medium Voltage Peak / Off-Peak Mining Tariff For each kilowatt of maximum demand per month during the Peak Period For all units during the Peak Period For all units during the Off-Peak Period Minimum monthly charge	RM/kW sen/kWh sen/kWh RM	17.00 17.80 9.80 100.00	Nil -4 Nil
12.	Tariff G – Public & Street Lighting Tariff For all units (including maintenance) For all units (excluding maintenance)	sen/kWh sen/kWh	17.30 10.80	Nil Nil
13.	Tariff G1 – Neon Light & Floodlight Tariff For all units	sen/kWh	11.80	Nil

N.B

- Consumers whose consumption for the month exceed 10 percent of the average monthly consumptions over the previous 6 months, are eligible for the promotional discount for that particular month.
- 'Specially for consumers who qualify' means industrial customers with electricity cost exceeding 5% of the total cost of production of their products.

- Low Voltage : Below 6.6kV
- Medium Voltage : 6.6kV to 66kV
- High Voltage : Exceeding 66kV
- Peak Period : 0800 hours to 2200 hours
- Off-Peak Period : 2200 hours to 0800 hours
