Background

The Malaysian Gas Association (MGA), in collaboration with the Energy Commission (EC) of Malaysia and Energy Council of Malaysia (ECOM), invites you to join us at the 4th National Energy Forum.

With the theme, **“Building A Framework Towards A Sustainable Energy Future”**, this year’s forum will present perspectives from Senior Government officials, industry captains, and key stakeholders on the optimum framework for the country’s energy sector.

Besides highlighting current issues, challenges and developments, the speakers will also share insights on government policies, regulations and strategies towards formulating the most appropriate framework which could help ensure sustainable energy to meet Malaysia’s future energy needs, and to power our economy.

The dialogue sessions have also been designed to provide energy practitioners and consumers with the rare opportunity to present their views and share ideas with key authorities and major energy providers.

Jointly organised by:
